

Increasing Physical Activity and Capacity through Apprenticeships

Raising aspirations of young people to lead to pathways into employment.

DN COLLEGES GROUP

PE and Sport Apprenticeship

DN Colleges Group works with Active Fusion staff to deliver PE and Sport Apprenticeships.

From these programmes, Apprentices will develop the confidence, skills, and qualities they need to progress into a career in coaching and teaching sports & PE and working with young people.

We work closely with employers to ensure that training is tailored to the needs of the apprentice for them to realise their full potential.

Why invest in a PE, Sport and Wellbeing Apprenticeship?

- An Apprentice can support with and lead PE lessons
- They can create additional capacity within your staff team to deliver more physical activity
- It provides the potential to offer more extra curricular activity - breakfast, lunchtime, after school clubs.
- Apprentices can support your school at events, trips and residential
- More staff, means more opportunity for young people to be physically active
- Employing an apprentice will enhance the reputation of your school by demonstrating your investment in local talent.

As Apprenticeship Manager, I am excited to work with local employers, inspiring the next generation of sports leaders to enable them to have highly positive impacts and leave lasting impressions on the lives of the young people they coach.

Adam Myers, Apprenticeship Manager

Did you know?

You can use Apprenticeships to up-skill existing staff

This is ideal for Teaching Assistants and other school-based support staff already working in a Physical Education and school sports setting.

The course enables staff to further their professional development and gain an additional professional qualification within the delivery of PE and school sport.

The course can be tailored to suit the needs of the individual and off-the-job training can be delivered face to face or remotely to suit the needs of both the individual and employer.

I have had the opportunity to get on the job experience within my school, and I have learned the skills to help me progress further within my own career in PE and Sport

**Matthew Dumbarton,
Active Fusion Apprentice**

How is the Apprenticeship Funded?

From April 2022 the National Minimum wage for apprentices will be £4.81 per hour regardless of age if it is their first apprenticeship year.

If your organisation pays into an apprenticeship levy, then all training fees will be paid for out of this.

Non-Levy paying employers will share the cost of training and assessing their apprentices with the government. Employers will pay 5% towards the cost of apprenticeship training with the government paying the rest (95%).

*Example: L2 Apprentice Sports Coach cost of training £6000, employer contribution £300 (5%)
Employers are also eligible for £1000 government funding for hiring an apprentice between the ages of 16-18*

Active Fusion is offering 50% match funding (value £450).

This offer, funded through our charitable funds, is available to all Voluntary and Community Sector organisations wishing to train an existing or new member of staff through the Level 3 Apprenticeship.
